AutoSpeed View provides direct access to Cantor Market Data's liquid, real-time fixed income market pricing, allowing raw market data to easily and rapidly be pulled into Microsoft Excel™ worksheets. The ease with Excel allows market participants to focus on their trading strategies, rather than on the time and effort needed to develop and update costly trading interfaces and analytics.

AutoSpeed View will allow traders to instantly model market-making, relative value, and other proprietary strategies in real-time and more easily across a wider range of markets, all through one application. By receiving live, tradeable Treasury prices in Excel, Portfolio Managers can create strategies or calculate spread prices for corporate, municipal, mortgage and other fixed-income securities.

With AutoSpeed View traders have the ability to stay ahead of the market, reduce costs, improve efficiency, and increase productivity.
